

AOZ Studio Beta - Bug #1148

Amiga, Track Volume X control not working (gurus) or internal error

05/11/2023 10:34 PM - malcolm harvey

Status:	Closed	Start date:	05/12/2023
Priority:	Normal	Due date:	
Assignee:	Baptiste Bideaux	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	none		
Affected version:	1.0 (u38)		

Description

Trakker .xm/mod trying to **control volume** of them when playing we need correcting or fixed. Again it used to work and not instantly guru. It was ok in previous versions as well.

- i) Track Load "resources/audio/music/xysong.xm" , "xysong" //works ok
- ii) Track Play "xysong" //works ok
- iii) Track Volume x // **Broken currently (Gurus)** needs correcting
- iv) Track Stop //works ok (no song parameter but that was how it was).

Note: We do have in Amiga manifest Volume which is 0-63 but that does not control .xm/.mod files volume at all tho. Link below for the issue and screen shots..€

Note: Also MVolume is to do with banks or .abk so that is no good here either in this way that I can see.

Although it seems to refer that .mod and .xm files loaded into a bank (6 default or 9) so Mvolume pos could work im not sure how francois did this Volume function, but again either way, it did work previously ok. Currently again broken. Gurus.

Thankyou.

History

#1 - 05/12/2023 12:48 AM - malcolm harvey

Same in u43.

#2 - 05/15/2023 10:40 PM - malcolm harvey

- Status changed from New to Closed

This has now been corrected by Steff. On the git for the next update.
