<b>Affected version:</b>	0.9.5.1		
<b>Description</b>			
Adding a "Wait Vbl" just before the "Next COUNT" at line 135 corrects the problem.			
Need to either modify speed: "safe", or add another option to slow things down.

This is actually a problem with several of the Help files. If this turns out to be more difficult than it's worth, I'd recommend at least modifying the help files just a little to compensate for the faster speed of AOZ. In the case of *this* one, (as I mentioned above), it only took one Wait Vbl to make everything work well. :-)

Help\_11 still runs too fast in 0.9.5.1.
