

AOZ Studio Beta - Bug #157

Jokes file missing from Examples/H-6 folder.

02/08/2020 07:35 PM - Brian Flanagan

Status:	Closed	Start date:	02/08/2020
Priority:	Normal	Due date:	
Assignee:	Francois Lionet	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	0.9.5		
Affected version:	0.9.4		
Description			
Example: Help_69 from AMOSPro_Examples.			

History

#1 - 02/21/2020 10:02 PM - Francois Lionet

- Status changed from New to Resolved
- Assignee set to Francois Lionet
- Target version set to 0.9.5

Joke missing from the default filesystem folder.

yet, this example will only work if you add the tag:
#addToFileSystem:"AMOSPro_Examples:Examples/H-6/jokes"

#2 - 04/19/2020 10:13 PM - Brian Flanagan

- Status changed from Resolved to Feedback

re-tested in 0.9.8.1.

Using #addToFileSystem:"AMOSPro_Examples:Examples/H-6/jokes", makes it work. (If this is required, it should be added to the Help_69 demo.

QUESTION: Shouldn't I be able to just add the **Folder** to the file system? It seems rather cumbersome to have to add **every file** to the file system! In other words, shouldn't

```
#addToFileSystem: "AMOSPro_Examples:Examples/H-6/"
```

...be sufficient?

#3 - 10/05/2020 12:32 AM - Brian Flanagan

- Status changed from Feedback to Closed

I'm calling this closed since we have a solution that works:
#addToFileSystem:"AMOSPro_Examples:Examples/H-6/jokes"

Hopefully, we'll eventually have a better solution for handling the filesystem.
