Volume 1.X still not working in Beta 1.x V8
Either flat out for nothing.

This ticket again is working now but only in manifest amiga, but not aoz.
In aoz manifest mode it comes up illegal error when executing cmd Volume .
1.0.0 Beta 12 U 19 and Also Beta 13 U21.

Updated. It seems Dave had pointed out which did not show was that aoz mode currently only supported floats from eg: 0 - 1 or 0.1,0.2,0.5 etc to 1
which is why it gave the errors using normal Volume . He is changing it to match the amiga mode 0 to 100 style. Should be consistent yes.
