Description

Example: Tutorials/AOZ Studio Lesson 2, step 2 (Line [#62](#))

Here's the line in question. (You can even run it by itself to illustrate the problem.)

```
Print "Q1 of 4": Input "Is the number 95 a number or a string? N or S"; ANSWER1$
```

The result is that the S at the end of the prompt is chopped in half. (See attached snapshot.)
