<b>Target version:</b>	
<b>Affected version:</b> 0.9.9.2	
<b>Description</b> Example: Help_9 from AMOSPro_Examples.  The code compiles, but the Gr Writing modes are all messed up. There are multiple issues here. The only thing that appears to be working is the color of the text.  Problems include: Font too large. (Appears to be in Lowres mode.) Font outlined instead of solid. The various Gr Writing modes do not work. All appear in the same style and color. (Inverted text not working, text masking not working, background masking not working, etc.)  See attached screen snapshots.
