

AOZ Studio Beta - Bug #492

Amiga mode printing, with correct amount of char across screen, next print line does CRLF

Target version:			
Affected version:	0.9.9.4-RC1		

Description

Amiga manifest mode, using the print command on say a 320x200 pixel screen.

eg: command print "your text here" it should be 40 char wide if screen is 320pixels wide/8 but it seems to be 39 char 1 short in Amiga mode anyways that will fit.

IE: If you put in 40 chars they fit as they should, but the next print line if directly under it, does a CRLF first before the next print, if only 39 characters on each line this does not happen.

eg: Should print like the below..40 characters wide on 320pixel screen

```
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
```

but it does the below instead.

```
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
```

Again, if you as above only print 39 characters on same 320pixel screen it prints fine as below not correct currently.

```
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
print "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"
```

History

#1 - 09/13/2020 11:34 PM - malcolm harvey

- Status changed from New to Closed

Updated, and noted, this can be corrected by using ; after the " at the end of each line required 40 chars.

#2 - 09/14/2020 11:04 AM - Brian Flanagan

- Assignee changed from AOZ Studio Team to Brian Flanagan

FYI, this also applies to AOZ mode.

Glad I could be of help! :-)
