#### Description

Every time I run a program my cursor vanishes and I'm somewhere else in the program when I return to the editor. This makes it very difficult when you have to keep scrolling back to where you were when testing things.

#### History

##### #1 - 09/19/2020 07:57 AM - Brian Flanagan

- Priority changed from Normal to Low
- Estimated time set to 1:00 h

Verified.

##### #2 - 04/13/2021 07:17 PM - Brian Flanagan

- Status changed from New to Resolved

Re-tested in 1.0.0 (B7).

No problems in the current version.

Cursor position remains constant after transpiling for both AOZ Editor or web browser.

If, however, an error occurs, the cursor will move to the position of the error in the code.
