Im using Windows, Browser Chrome, but again it rather relates to AOZ/Atom editor not the browser.

Aoz/Atom itself when reopened. ie: Or rather, if you reopen your code in aoz/atom again, usually you would click on AOZ Studio beta for example and it reopens your old code you were working on, including if you had folded code (stays folded as it was) and it scrolled to the last edited position. And if you had split windows open say, split horizontal they would open again as before. Neither of this is happening currently, it used to.

Now that the editor atom is now being decommissioned shortly, ill close this ticket.

In the new editor online/offline im hoping this can be reintroduced. (Bookmarks and Folding code).

Closed.
