Actually, there ARE also problems on renaming the .aoz source as well.

On the Windows version, renaming will leave a file by the previous name 0 bytes long in the same folder.

It will also NOT update the Project tree with the new name for the file.

- Affected version changed from 1.0.0 (B3) to 1.0.0 (B10) u16

Still works in macOS in 1.0.0 (B10) u16 (21 Oct 2021)

Is this working in Windows yet, Baptiste P?

This has been working fine in macOS for some time.

Baptiste P: Is it still broken in Windows?
