

## AOZ Studio Beta - Bug #714

### Leaving the 2nd parameter off of locate fails now.

04/05/2021 03:29 AM - Brian Flanagan

<b>Status:</b>	Feedback	<b>Start date:</b>	04/04/2021
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Francois Lionet	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	1:00 hour
<b>Target version:</b>	1.0.0 (B7)		
<b>Affected version:</b>	1.0.0 (B7)		

#### Description

This used to work. It causes an Internal error now.

Example:

```
Locate 2,2
Print "Test "
Locate 1, // This line fails
Print "Test 2"
```

#### History

##### #1 - 04/05/2021 03:29 AM - Brian Flanagan

- Estimated time set to 1:00 h
- Affected version set to 1.0.0 (B7)

##### #2 - 04/05/2021 07:45 AM - Francois Lionet

- Status changed from New to Resolved
- Target version set to Beta 7

Fixed!

##### #3 - 04/14/2021 02:20 PM - Brian Flanagan

- Status changed from Resolved to Feedback
- Priority changed from High to Normal
- Target version changed from Beta 7 to 1.0.0 (B7)

Re-tested (4/14/2021). Partially fixed.  
Now works **unless** there is a // comment at the end of the line

I suspect that the / is being parsed as a part of an expression a locate parameter.  
If two consecutive // are found, however, it should recognize this as a comment.

```
Locate 4,4 // This fails (because of the comment)
Locate 4, // This fails (because of the comment)
```

**NOTE:** This is probably a problem in the transpiler for **any** command that ends with a numeric parameter.

A side note, just FYI: The ' comments work fine:

```
Locate 4,4 ' This works
Locate 1, ' So does this
```
