### History

#### #1 - 06/20/2021 08:53 PM - Brian Flanagan

- Affected version changed from Beta 7 to 1.0.0 (B8)

Re-tested in 1.0.0 (B8) v14  
Partially fixed.

If you type:

```
Sqr
```

...and then hit F5, you'll get what you expect, however, if you type:

```
Sqr ( )
```

...(with the parentheses), and then hit F5, it no longer gets an error, however, it returns the wrong help.

#### #2 - 06/20/2021 09:37 PM - Brian Flanagan

- File *Wrong\_Help.png* added

- Assignee changed from Paul Kitching to Francois Lionet

With the cursor placed after the ( the results are unexpected.

#### #3 - 09/19/2021 06:24 PM - Paul Kitching

- Affected version changed from 1.0.0 (B8) to 1.0.0 (B10) u16

Still a problem in Beta 10.
