# AOZ Studio Beta - Bug #776

# Filesystem: Append not working.

06/11/2021 07:40 AM - Brian Flanagan

Status: Resolved Start date: 06/11/2021

**Priority:** Due date: High

Assignee: Baptiste Bideaux % Done: 0%

Category:

**Estimated time:** 24:00 hours

Target version: none Affected version: 1.0.0 (B8)

### **Description**

The following example generates an Internal Error at the Close 1 statement:

Append 1, "info.txt" ' Should open info.txt on the default file system if it exists, or create it i f it doesn't.

Print #1, "APPENDED" ' Write something to the file. Close 1 ' Close the file (Get Internal error here)

I tested this where info.txt does exist, and can be read using Open In 1 and Line Input #1,X\$
