Affected version:	1.0.0 (B10) u16			

Description

Re: Brave browser, when you publish an app online for use in the Browser online, if you publish it an run it in the brave browser (Chromium based), the cursor flashes but the flashing line is broken in alot of places. Not solid.
Note: The offline testing versions in either the f1 Viewer or the f2 Browser local works as it should.
See screenshots.
