<b>Category:</b>		<b>Estimated time:</b>	0:00 hour
<b>Target version:</b>	none		
<b>Affected version:</b>	1.0.0 (B10) u16		
<b>Description</b>			
Get block and Put Block is broken in preview window, ok in real browser, Get block ok, but Put block says, "Block not defined" even though it is. Again in browser Put block works fine, previewer broken.			

### History

#### #1 - 09/21/2021 01:11 AM - Brian Flanagan

- Status changed from New to Feedback

Thanks for the report.

Could you please provide example code illustrating the problem?

#### #2 - 09/21/2021 10:02 AM - malcolm harvey

If you do the below now in the previewer, it gives, "Block not defined"  
Again, it works in the real browser though.

This used to work in both previously to and including (B8) U15.

The Get block works, just the Put block now says previous block not defined.

```
Get Block 1,480,384,160,64
```

```
Put Block 1,160,88
```

#### #3 - 09/21/2021 10:58 PM - Brian Flanagan

I tried it here using 1.0.0 (B10) u16 in macOS, AOZ manifest.

(What hardware

It works fine in both the AOZ Viewer and the browser (Chrome).

I do not get the "Block not defined" error.

I added a line to make it easier to see when it's working.

```
Draw 480,384 To 480+159,384+63
```

```
Get Block 1,480,384,160,64
```

```
Put Block 1,160,88
```

Was there more to your code besides the 2 lines?

#### #4 - 09/22/2021 02:57 AM - malcolm harvey

Yes, it does seem to work sep, but if im using that in my existing code when the viewer runs, it comes up with that error on the put block line.  
Again chrome, mozilla, edge whatever works same code, but just not viewer, in u16 but did in u15 beta 8. Very odd.

I'll see if i can get maybe the total snippet for this operation and post it back here too see.

Hard to replicate tho as so much going on in there.

It is in Amiga manifest I get this.

#### #6 - 09/23/2021 08:59 AM - malcolm harvey

Well this is the code that it is in the real game, again nothing special and all these screens are open, but yet again, in browsers any of them it works and runs fine, but in the u16 viewer it comes up with "Block not defined" on the Put Block command.

```
..
screen 2 //restart game gfx right screen 0----*
//Get Icon 2,1,0,128 To 160,256
Get Block 1,480,384,160,64

screen 0
pen 0
paper 0
ink 0 //set black to clr gfx area

Bar 160,56 to 320,184 //blank it center out 320,184 scr 0

screen 0
//Paste Icon 160,56,1
Put Block 1,160,88 //restart pastes it on the gfx game picture screen 0---*
```

#### #7 - 09/23/2021 10:08 AM - malcolm harvey

It is simply called in a sub routine and return.

```
..
Just gets block from source screen 2 and then puts block to dest screen 0.
Yes, very odd. If I comment out this line "Put Block 1,160,88" the next line of
code is just "screen 1" which should just redirect cmd back to screen 1 and then
it says "Screen not opened" which again it is. Yes none of this makes sense.
..
Why would all these errors come in only the viewer and yes executes in the browsers ok.
Im starting to think to myself, unless some of the screen modes are not opening only
in the viewer U16 and then going on to give other errors based on that failing.
I guess at least it works in the browsers for now is the main thing.
These are the screen modes and screen displays im using that work in the browsers.
```

```
..
offsetposxnow=120

offsetposynow=40
offsetposx=123

offsetposy=50
//..
Screen Open 0,320,256,256,lowres
screen display 0,offsetposxnow,offsetposynow,320,256
//..
Screen Open 1,160,236,256,lowres
Screen Display 1,offsetposx,offsetposy,158,236
//..
Screen Open 2,640,512,256,lowres
screen display 2,0,0,640,512
//..
Screen Open 3,640,512,256,lowres
screen display 3,0,0,640,512
//..
Screen Open 4,640,512,256,lowres
screen display 4,0,0,640,512

//..
Screen Open 5,160,128,256,lowres

Screen Display 5,280,94,160,128
//..
Screen Open 6,320,256,256,lowres

screen display 6,offsetposxnow,offsetposynow+10,320,256
//..
Screen Open 7,160,128,256,lowres

screen display 7,offsetposx,offsetposy,160,128

//..
Screen Open 8,160,128,256,lowres
```

screen display 8,0,0,160,128

//..

screen open 9,160,128,256,lowres

screen display 9,-160,-128,160,128

//..

screen open 10,160,128,256,lowres

screen display 10,-160,-128,160,128

**#8 - 09/24/2021 02:58 AM - malcolm harvey**

Yeah only issue is cant debug like that of course.

**#9 - 09/28/2021 04:54 PM - Francois Lionet**

Malcom, can you just send me your application? I will be able to fix this easy if it crashes in front of me...  
?

**#10 - 09/28/2021 08:03 PM - malcolm harvey**

I could send in we transfer, do you have email address I could send it to to test?

..

**#12 - 09/29/2021 06:49 AM - malcolm harvey**

Ive emailed you now the .aotzip to look at. (Wetransfer).

**#13 - 12/18/2021 10:08 PM - malcolm harvey**

These errors in relation to Screen not opened and Put block etc etc odd random thing in previewer and not browser, all tied in now to the problem of using the "Every x interrupt" cmd in Amiga emulation. Same as ticket 866.
