As updated with notes from Baptiste, you have to also use other cmds to display the video as they are stored in a buffer.

eg:  
//Displays the video image on the screen (equivalent to Paste Bob)  
Play Video "video"  
Draw Video "video", 100, 100, 640, 480

or  
// Stores the image of the video in the bank image at index 255  
Video Bob "video", 255  
Bob 1, 100,100,255
