

AOZ Studio Beta - Bug #976

If Exist cmd not working correctly always saying true whether exists or not

12/09/2022 09:46 PM - malcolm harvey

Status:	Closed	Start date:	12/10/2022
Priority:	Normal	Due date:	
Assignee:	Baptiste Bideaux	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	none		
Affected version:	1.0.0 (B17)		
Description			
From both examples below..problem now using the If Exists cmd			
B) The bug of first time no exist (false) and secondtime it does exist (true).			
A) The bug always (true) in the latest version whether exists or not.			
It should work either way correctly in reality.			
..			
eg: In the original web live version and previous to that all versions if using just the below a) ver it should work like this. It does not need to open a file first to test, because the if exist does this for you in one go.			
..			
a) //eg: What Brians, Paul & I have always used, (again which again all worked previously ok).			
..			
If Exist ("mystupiderfile.txt")			
Print "yes" //do this true exists			
Else			
Print "no" //no not exist.			
End If			
..			
b) //eg:Laurant's example			
..			
Filename\$="toto"			
Open Out 1, Filename\$			
If Exist (Filename\$) = False Then Print "do not exist" // test if the file already exist			
Print "exist"			
Close 1			
End			
..			
//His notes: If you use a file name for first time will say not exist, second time will say it exist			

History

#1 - 12/14/2022 09:37 PM - malcolm harvey

Strange indeed, this issue seems to have corrected itself using same code after windows updates and also browser updates to ver 108.x today in the aoz edu version anyways.

Says now, **no** as it should as file does not exist.

I will retest again with later betaoz channel update, and see if still fixed to confirm and if so, then close ticket.

#2 - 12/28/2022 09:18 AM - malcolm harvey

It seems to still exist this bug, saying file always exists in browser regardless of whether its there or not.

Leaving ticket open.

#3 - 12/29/2022 11:17 PM - malcolm harvey

- Assignee changed from AOZ Studio Team to Baptiste Bideaux

#4 - 12/29/2022 11:58 PM - malcolm harvey

Same problem in V1.0 U33.

#5 - 12/30/2022 01:05 PM - malcolm harvey

- Status changed from New to Closed

The fix or solution for this is to use an = true after the exist() function.
Something changed in recent version now that require this.

eg:

```
If Exist("mystupiderfile.txt") = True
```

```
Print "yes" //do this true exists
```

```
Else
```

```
Print "no" //no not exist.
```

```
End If
```

Closed ticket.
